

Recheck of a Daniels Faculty Course Mark

If a student believes that there has been an addition error in calculating the course mark in a Daniels Faculty course, the student may request a recheck of the course mark. A recheck can be requested with or without having viewed the final examination. The student must fill out the Request for Recheck of Daniels Faculty Course Mark form on the following page and submit it to the Office of the Registrar and Student Services within six months of the final examination (deadlines below). Whenever possible the student should indicate precisely where s/he believes that the calculation error has occurred. The Daniels Faculty will check that the examination marks have been added correctly and will check that all term work marks have been correctly calculated. The final examination will **not** be reread. There is no fee for requesting a recheck of a course mark.

Note that a recheck of a course mark may result in a raised mark, a lowered mark, or no change in the mark.

The form on the following page is to be used to request a recheck of a Daniels Faculty course mark only. For information on how to request a recheck of a Faculty of Arts & Science course mark, see <http://www.artsci.utoronto.ca/current/exams/rr>
